Section 1. Identification

GHS product Identifier Polyguard NHT-5600 Epoxy -Part B
Other means of identification Not available

Relevant identified used of the substance or mixtures and uses advised against
Used for protection of pipeline field joints, girth welds, valves, fittings. This product may also be used to repair holidays on FBE coated pipes and as a pipeline rehabilitation coating.

Supplier’s details Polyguard Products, Inc.
4101 South Interstate 45
Ennis, TX 75119
Tel: (214) 515-5000

Emergency telephone number) with hours of operation) CHEMTREC, US 1-800-424-9300 International 1-703-527-3887 (24/7)

Section 2. Hazards Identification

OSHA/HCS status This material is considered hazardous by the OSHA Hazardous Communications Standard (49CFR1910.1200). This SDS contains valuable information critical to the safe handling and proper use of the product and should be retained and available for employees and other users of this product.

Classification of the substance or mixture Skin Irritation- Category 2
Skin Sensitizer- Category 1
Aquatic Hazard (Long-term)- Category 2

GHS label elements Hazard Pictogram

Signal word DANGER

Hazard statement H302 - Harmful if swallowed
H312 - Harmful in contact with skin.
H317 - May cause an allergic skin reaction
H334 - May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H362 - May cause harm to breast-fed children.
H360 - May damage the unborn child. Suspected of damaging fertility.
H314- Causes severe skin burns and eye damage.
H400- Very toxic to aquatic life.

Precautionary statements Prevention
P201 - Obtain special instructions before use.
P202 - Do not handle until all safety precautions have been read and understood.
P281 - Use personal protective equipment as required.
P280- Wear protective gloves. Wear eye or face protection. Wear protective clothing.
P273 - Avoid release to the environment.
P263 – Avoid contact during pregnancy/while nursing.
P261- Avoid breathing dust/fume/gas/mist/vapor/spray.
P270- Do not eat, drink or smoke when using this product.
P264- Wash hands thoroughly after handling.
P272- Contaminated work clothing should not be allowed out of the work place.

Response
P391- Collect spillage
P314- Get medical attention if you feel unwell.
P308, P313- IF exposed or concerned: get medical attention.
P304,P340,P310- IF INHALED: remove victim to fresh air and keep at rest position comfortable for breathing. Call a POISON CENTER or physician if you feel unwell.
Section 2. Hazards Identification

Response

P301, P310, P330, P331- IF SWALLOWED: Immediately call a POISON CENTER or physician. Rinse mouth. DO NOT induce vomiting.
P303, P361, P353- IF ON SKIN (or hair) Take off immediately all contaminated clothing. Rinse skin with water or shower.
P302, P352, P363- IF ON SKIN: wash with plenty of soap and water. Wash contaminated clothing before reuse.
P333, P313- If skin irritation or rash occurs: Get medical attention.
P305, P351, P338, P310- IF IN EYES: rinse cautiously with water for 20 minutes. Remove contacts lenses if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician.

Storage

P405- Stored locked up

Disposal

P501- Dispose of contents and container in accordance with local, regional and international regulations.

Hazards not otherwise classified

None known

The exact percentage (concentration) in the composition has been withheld as a trade secret. Occupational exposure limits, if available are listed in section 8.

Section 4. First Aid Measures

Description of necessary first aid measures:

Eye contact

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 20 minutes. Get medical attention if symptoms occur.

Inhalation

Remove victim to fresh air and keep at rest position comfortable for breathing. If breathing is difficult, immediately get medical assistance.

Skin contact

Immediately remove contaminated clothing. Rinse skin with water or shower. Wash with plenty of soap and water. Wash clothing before reuse. If skin irritation or rash occurs: Get medical attention.

Ingestion

Immediately call a POISON CENTER or physician. Rinse mouth. DO NOT induce vomiting. Never give anything by mouth to an unconscious person.

Section 5. Fire-Fighting Measures

**Extinguishing media**

Use water spray, ABC type dry chemical extinguishers, foam or carbon dioxide. Water and foam may cause frothing.

**Unsuitable extinguishing media**

None known.

**Specific hazards arising from the chemical**

Product will burn if ignited. Closed containers may rupture when exposed to extreme heat.

**Hazardous thermal decomposition products**

Decomposition products may include the following materials:

- Carbon Dioxide
- Carbon Monoxide
- Aldehydes
- Various hydrocarbons
- Phenols

**Special protective equipment**

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full-face piece operated in a positive pressure mode.

**Special protective actions for fire fighters**

Promptly isolate the scene by removing all persons from the vicinity of the incident is there is a fire. No action shall be taken involving any personal risks or without suitable training.

Section 6. Accidental Release Measures

**Personal precautions, protective equipment and emergency procedures.**

**For non emergency personal**

No action shall be taken involving any personal risk or without suitable training. Keep unnecessary and unprotected personnel from entering. Do not touch or walk thru spilled material. Shut off all ignition sources. No smoking, flares or flames in hazard area. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

**For emergency responders**

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in “For non-emergency personnel.”
Section 6. Accidental Release Measures

Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

Methods and materials for containment and cleaning up

Spills

Wear proper personal protective clothing and equipment. Approach release from upwind direction. If spilled in an enclosed area, ventilate and eliminate ignition sources. Contain spill by diking with sand, earth or other non-combustible material. Absorb spill with an inert material. Place into a labeled, closed container. Store in a safe location to await disposal.

Section 7. Handling and Storage

Precautions for safe handling

Protective measures

Put on appropriate personal protective equipment (see Section 8). Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid inhalation of aerosol, mist, vapor, spray, fume or vapor. Avoid release to the environment. Do not cut, weld on or near the container. Use under well-ventilated conditions.

Advice on general occupational hygiene

Eating, drinking and smoking should be prohibited in areas where material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Wash contaminated clothing before reuse. Discard shoes contaminated with this product. See section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry cool and well-ventilated area away from incompatible materials (see section 10) and food and drink. Keep away from heat, sparks and open flames. Keep container tightly closed and sealed until ready to use. Do not store in unlabeled containers. Empty containers contain residual product which may exhibit hazards of the product. Do not reuse empty containers.

Section 8. Exposure Controls/Personal Protection

Occupational exposure limits

</tbody>
</table>
Section 8. Exposure Controls/Personal Protection

Appropriate engineering controls
If user operations generates dust, fumes, gas, vapor or mist, use process enclosures, or local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory level.

Environmental exposure controls
Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

Hygiene measure
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking, and using the lavatory and at the end of the working period. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection
Safety eyewear complying with an approved standard should be used when risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases and dusts.

Skin Protection
Hand protection
Chemical- resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Body protection
Personal protective equipment for the body should be selected based on the task being preformed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection
Appropriate footwear and any additional skin protection measures should be selected based on the task being preformed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection
Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 10. Stability and Reactivity

Reactivity
Exothermic reactions including polymerization may occur in contact with amines, strong acids, strong bases, alcohols, strong oxidizing agents and excessive heat.

Chemical stability
Exposure to excessive heat and ignition sources will cause product to auto-polymerize at very high temperatures.

Possibility of hazardous reactions
Under normal conditions of storage and use, hazardous reaction will not occur.

Conditions to avoid:
Excessive heat, sources of ignition.

Incompatible materials
Reactive or incompatible with the following materials: Strong acids, bases, and oxidizing agents.

Hazardous decomposition products
Thermal decomposition may produce smoke, carbon dioxide, carbon monoxide, aldehydes and other products of incomplete combustion.

Information on the likely routes of exposure
Routes of entry anticipated: dermal contact, inhalation.
Section 11. Toxicological Information

Potential acute health effects
Eye contact
Eye irritation
Inhalation
May cause irritation of the respiratory tract and mucous membranes.
Skin contact
Skin irritation. May cause allergic skin reaction.
Ingestion
Cause irritation.

Symptoms related to the physical, chemical and toxicological characteristics
Eye contact
No known significant effects or critical hazards
Inhalation
No known significant effects or critical hazards
Skin contact
No known significant effects or critical hazards
Ingestion
No known significant effects or critical hazards

Delayed and immediate effects and chronic effects from short- and long-term exposure

Short term exposure
Potential immediate effects
No known significant effects or critical hazards
Potential delayed effects
No known significant effects or critical hazards

Long term exposure
Potential immediate effects
No known significant effects or critical hazards
Potential delayed effects
No known significant effects or critical hazards

Potential chronic health effects
General
No known significant effects or critical hazards
Carcinogenicity
No known significant effects or critical hazards
Mutagenicity
No known significant effects or critical hazards
Teratogenicity
No known significant effects or critical hazards
Developmental effects
No known significant effects or critical hazards
Fertility effects
May cause damage to unborn child.

Numerical measures of toxicity
Acute toxicity estimates
There is no data available

Section 12. Ecological Information

Toxicity
There is no data available
Persistence and degradability
Not readily biodegradable
Bioaccumulative potential
There is no data available
Mobility in soil

Soil/water partition coefficient (Koc)
There is no data available.

Other adverse effects
No known significant effects or critical hazards

Section 13. Disposal Considerations

Disposal methods
The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor.
